

## ch kids @ home

- We have a preschool room for 3-5 year olds and a K-5<sup>th</sup> room downstairs.
- Parents will need to register in advance to secure a spot as we have limited in-building capacity. (Preschool: 8 kids/service, K-5<sup>th</sup>: 20 kids/service)
- Kids will be required to wear a mask at all times in the building.
- If we are outside, kids will be allowed to remove their mask. We will utilize our outdoor spaces more often when weather permits.
- We will utilize social distancing, to the best of our abilities, in our learning environments.
- Kids will use hand sanitizer or wash their hands with soap upon entering the room.
- Kids will have their temperatures checked and must fall below 100.4 to enter the room.
- Our room, equipment, supplies and frequently touched surfaces in the halls will be sanitized between uses.
- Kids will not share supplies with each other.
- We will not have free play time inside our rooms, but will offer fun activities that kids can do at their seat before and after our worship & Bible lesson.
- To maximize the number of children able to participate, children may only attend one service when multiple are available.

Our in-building worship service will be created from the same content as our CH Kids @home so that in-building worship and at home worship are aligned. This gives children the opportunity to move seamlessly between the two experiences as we work our way through the Bible. In addition, we offer monthly CH Kids @home packs to enhance the home experience. These packs include crafts/activity supplies to use with each week's Bible lesson for the month. Packs can be picked up anytime in the plastic bins at the main entrance of the church.

Parents whose children are registered for the in-building kids worship experience will receive an email prior to Sunday that includes safety information and a reminder that children displaying symptoms of illness should utilize our CH Kids @home worship experience. If a group needs to be canceled last minute, those registered will be notified by text and phone call.

We will expand the in-building opportunities as we identify need and ability to do so safely.
